Evaluation of tool selection, technical implementation, and functionality.

3. Individual Contribution

Measurement of student involvement, ownership, and responsibility.

4. Response to Queries

Assessment of conceptual clarity and ability to justify decisions.

Criterion	Excellent (5 Marks)	Good (4 Marks)	Average (3 Marks)	Fair (2Marks)	Poor (1 Mark)
Design & Methodology	Highly appropriate design; clear, logical workflow; strong clarity and justification.	Appropriate design; minor gaps in workflow or clarity.	Basic design; limited clarity in methodology.	Design needs improvement; workflow not fully clear.	Unclear/inappropriate design; major issues;
Modules	Module description is clear, detailed, well-structured, and explains objectives, inputs, outputs, and functionality completely.	Description is clear and mostly complete with minor missing details.	Basic description provided but lacks clarity or detailed explanation.	Description is vague, incomplete, or poorly structured.	No proper module description provided.
Individual Contribution	Strong active involvement; clear ownership and responsibility.	Good involvement with minor gaps.	Moderate contribution; partial responsibility.	Limited involvement; needs guidance.	Minimal contribution; unable to explain work;
Response to Queries	Strong conceptual clarity; confidently justifies decisions.	Good understanding; justifies most decisions.	Basic clarity; limited justification.	Weak conceptual clarity; difficulty answering.	Unable to justify work; lacks understanding;
